Dear drs. Debray,

The Educational Committee Life Sciences monitors the quality of all courses offered by the Graduate School of Life Sciences. Our assessments are based on student surveys and on feedback from the course coordinator. Earlier you have received a detailed evaluation form and a feedback form to return with your comments.

For the past academic year, the students judged the quality of your teaching and the course in general as: Good.

We congratulate you with this result and count on continuation of your contribution to the Graduate School's education in the future.

On behalf of the Educational Committee and the Executive Board of Studies, we express our appreciation to you and everyone else involved in organizing and teaching this Master's course.

Yours sincerely,

Dr. S.I. The  
Chair Educational Committee

Prof. J. van Strijp  
Chairman Executive Board of Studies

Cc Dr. M.S. Verhoef-Jurgens
